

## DUST CONTROL POLICY

The municipality may provide dust control at any location as it determines. Depending on circumstances, ratepayers wishing for dust control have two options:

- 1) Pay a one-third portion of costs; with the municipality paying the other two-thirds cost;
- 2) If the ratepayer lives within an area of the municipality where the cost of the dust control is assisted by an oil company:
  - a) @ 50% oil company costs - the municipality shall pay the remaining 50%.
  - b) @ 100% oil company costs - municipality shall pay 0%.

Should a ratepayer wish to have a dust control surface watered they can do the same at their own cost. The municipality can also provide watering of dust control spots at its own expense if it feels warranted.
